

## TECHNICAL DATA

# CONCENTRATED CLEANING SOLUTION CRAZY CLEAN

### PRODUCT DESCRIPTION

**Crazy Clean** is a highly effective concentrated cleaning solution specially formulated to remove surface contaminants such as oils, dirt and oxidation. **Crazy Clean** is environmentally safe, non-toxic and leaves no contaminating by-products or pollutants to damage the environment.

### RECOMMENDED USES

**Crazy Clean** is specially formulated for general cleaning purposes. This concentrated formula can be used full strength for heavy duty spot cleaning or diluted. **Crazy Clean** can also be used as a general cleaner for routine maintenance.

### COLOR AND PACKAGING

Green  
1 Gallon

### STORAGE AND SPILLAGE INSTRUCTIONS

In case of spillage, absorb with inert material and dispose of in accordance with applicable regulations.

### CLEAN UP

Water

### SURFACE PREPARATION

It is extremely important to get the roof clean and dry. First, remove heavy deposits of dirt, leaves and other debris from the roof using a broom or air broomer. Then, inspect the entire surface for any open seams, tears, cuts, etc. Repair these flaws so water is not blown in under the substrate during the cleaning process. Pressure-wash the roof with water and allow it to dry completely.

Biological Control: Areas of algae, mildew or fungus on the roof or the existing coating should be treated with a solution of 1 part household bleach to 3 parts water, followed by a power washer rinse using clear water.

### APPLICATION INSTRUCTIONS

For general cleaning, combine 1 part **Crazy Clean** with up to 8 parts water. Maximum coverage when mixed at this ratio is 400 square feet per gallon. After the roof is completely dry from initial cleaning, apply **Crazy Clean** with a low pressure sprayer, using a 3-4 foot (0.91-1.22 m) arc pattern. A Hudson type agricultural sprayer, conventional pressure sprayer, or airless sprayer is recommended. Allow solution to stand for 10-15 minutes, adding a light mist of water to prevent drying. While it stands, lightly agitate any heavily soiled areas with a broom or brush. Do not allow dirt to settle in low areas.

After application of **Crazy Clean**, use a commercial power washer 3,000 psi (20.69 MPa) to remove debris and continue rinsing until all suds are gone. Start at the lowest point of the roof and work towards the highest point. It is important to keep the surface wet until **Crazy Clean** and other residue has been completely rinsed off and the surface is clean.

### DRYING

After cleaning and rinsing the roof, ensure no dirt or debris is present. Allow surfaces to thoroughly dry to prevent blistering. Examine roof, paying particular attention to areas of physical damage to determine that residual water has in fact dried before applying coating. Note: Drying time depends on weather conditions such as temperature, humidity and air movement.

### PRECAUTIONS

Wear protective gloves, protective clothing, eye protection, face protection. Wash hands thoroughly after handling. KEEP OUT OF THE REACH OF CHILDREN.

### LIMITATIONS

Technical data is true and accurate at date of issuance, but subject to change without notice. Our products conform to **Crazy Seal**® quality standards, but no other warranty or guarantee is expressed or implied. Liability, if any, is limited to replacement of product. Labor, cost of labor or other consequential damages is hereby excluded.
